

Manuscript Shelfmarks

This document lists all seventy-four palimpsests imaged in the Sinai Palimpsests Project according to their shelfmarks at St. Catherine's Monastery.

Shelfmarks refer solely to overt text.* Following the logic of their cataloging in the monastery's library, manuscripts on the Research Site are listed:

1. **Alphabetically** by language group.
2. **Categorically** within each language group:
 - Old Collection** manuscripts (e.g., Georgian 10) precede **New Finds** (e.g., Georgian NF 7), which precede **New Finds fragments** (e.g., Georgian NF frg 68a). For historical background, see "[St. Catherine's Monastery, its Library, and its Palimpsests](#)".
 - Within Greek New Finds, **majuscules** ("MG") precede **minuscules** ("M").
3. **Numerically** within each category (e.g., Syriac 2A, 5, 7, 30).

In citations, prefix each shelfmark with "Sinai" (e.g., Sinai Arabic 514; Sinai Greek NF MG 2).
